*Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 through 11, drawn to an apparatus including an air conditioner and a chamber cooled thereby, classified in class 165, subclass 48.1+.
  - II. Claims 12 through 17, drawn to a method for manufacturing a device, classified in, for example, class 29, subclass 1+ or class 437, subclass 1+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process that is invention II as claimed can be used to make whichever product or widget the manufacturing equipment provided within the chamber is designed to produce and not necessarily to make the apparatus that is invention I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and also because the search

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
